Dr. Virginia M Kinsella

Dr. Virginia M Kinsella is a Board Certified Medical Oncologist who was born and raised in Porto Alegre, Brazil. In 1987, she earned her medical degree from Pontifical Catholic University School of Medicine. Dr. Kinsella completed her residency in internal medicine at Texas Tech University Health Science Center in Lubbock, TX and her fellowship in Medical Hematology/Oncology at George Washington University Medical Center in Washington, D.C. Dr. Kinsella has been in private practice in Plano, TX since 2004.

Practice Focus and Philosophy:
Dr. Kinsella has served at Texas Health Resource Presbyterian Hospital of Plano as the Physician Cancer Liaison for outreach into the community, as well as serving in the Internal Review Board (IRB) for reviewing cancer research. She believes in creating awareness of prevention and early detection of cancers and the importance of a broad social network of support within the community for cancer patients and their families.

Her clinical interests include the treatment and prevention of recurring cancer, as well as target therapy for hematological malignancies. Over the past several years, Dr. Kinsella has continued in serving the community in Plano and North Dallas area by participating in several community-based fairs and given lectures in cancer related topic in English, Spanish and Portuguese.

Dr. Walter X. Loyola is board Certified by The American Board of Neurological Surgeons with a fellowship in spine surgery from the University of South Florida, and therefore is one of the foremost experts in this complex and challenging field of medicine. He is involved in trials and development of new technologies, products, and techniques for spine and brain surgery including minimally invasive procedures of the spine, stereotactic brain surgery, and Hamon iMRI Neurological Suite.

Dr. Loyola has been recognized in D Magazine’s Best Doctors peer review as one of the city’s best since 2005. He believes in using a conservative approach to treating his patients. He carefully researches each patient’s condition before determining whether or not surgery is necessary. He is well known for his successful outcomes of procedures of the brain and spine.
